

Tailgate Cornhole Board Plan

24 x 36 in (2 x 3 ft) board -- top and side views

Tailgate (2 x 3 ft) boards keep the regulation width, hole and slope and lose a foot of length -- they fit a trunk and a tailgate, but they are not legal for league play

Same 6-in hole 9 in from the top and 12 in from each side; back edge 12 in, front edge 3-4 in

Because the board is shorter the slope is steeper (about 13 degrees); some builders drop the back to 10 in to soften it

Throw from 21-27 ft as space allows; three tops come out of one 4 x 8 ft sheet
