

Bumper Pool Table Room Size

Cloth plus two cue lengths each way -- 48-in and 42-in cues

Room = cloth + two cue lengths each way: 48 x 24 in cloth + 96 in = 12 x 10 ft with 48-in cues; + 84 in = 11 x 9 ft with 42-in cues. Add a foot if the wall has trim or a radiator

Octagon (42-in cloth): 11 ft 6 in square with 48-in cues, 10 ft 6 in with 42-in. A 3-in-1 dining table needs the same clearance when the top is off, plus chair room when it is on

Both players shoot from the ends toward the far pocket, so the end clearance gets used every rack; the sides are for bank shots off the long cushions
