

Dartboard Height and Distance

5 ft 8 in to the bull; 7 ft 9 1/4 in oche (8 ft soft tip) -- side view

Measure the height to the centre of the bull, not to the top of the board; measure the oche from the face of the board, not the wall -- a 1 1/2-in board moves the line

Steel tip (WDF / PDC): 5 ft 8 in (1.73 m) and 7 ft 9 1/4 in (2.37 m). Soft tip (NDA): same height, 8 ft (2.44 m). The diagonal from the bull to the back of the line checks both: 9 ft 7 3/8 in (2.93 m) steel, about 9 ft 9 1/2 in soft

Lane: keep 2 ft clear each side of the board (5 ft wide) and 3-4 ft behind the line, so about 11-12 ft from the wall. Face the board away from doors and walkways
