

Pool Table Markings -- Labeled

Head string, spots, sights, pockets and the kitchen

The kitchen is the area behind the head string: the cue ball starts there for the break, and under bar rules returns there after a scratch
Sights (diamonds) sit at every eighth of the length and every quarter of the width -- the reference points for kicking and banking systems
Pocket sizes and the 29 1/4 - 31 in height are WPA specifications; 7- and 8-ft tables carry the same markings at the same proportions
